OCTOBER 2012

AMERICAN PSYCHOLOGICAL ASSOCIATION

CONGRESSIONAL FELLOWSHIP PROGRAM

DUE: JAN 11

WRITE: Congressional Fellowship Program
Government Relations Office
American Psychological Association

Washington, DC 20002-4242

WEB: <http://www.apa.org/about/awards/congress-fellow.aspx>

E-MAIL: mhaskell-hoehl@apa.org

PHONE: 202/336-5935

The purpose of this fellowship is to provide psychologists with an invaluable public policy learning experience, to contribute to the more effective use of psychological knowledge in government and to broaden awareness about the value of psychology-government interaction among psychologists and within the federal government. Fellows spend one year working on the staff of a member of Congress or congressional committee. Activities may involve drafting legislation, conducting oversight work, assisting with congressional hearings and events, and preparing briefs and speeches. Fellows also attend a two week orientation program on congressional and executive branch operations, which includes guidance in the congressional placement process, and participate in a year-long seminar series on science and public policy issues. The American Association for the Advancement of Science (AAAS) administers these aspects of the program for the APA Fellows and for fellows sponsored by over two dozen other professional societies. **ELIGIBILITY:** An applicant must: (a) Be a psychologist, a member of APA (or applicant for membership), and a U.S. citizen; and (b) Have a doctorate in psychology (from an APA accredited doctoral program and internship, if in the area of professional psychology) or related field by the application deadline. A special exception is made for current psychology interns who may apply with certification from the director of training in their doctoral program that they have met all but the internship requirement for their doctoral degree by the application deadline. It should be noted that preference will be given to applicants with two or more years of experience following receipt of their doctorate. **FUNDING:** APA will sponsor one Fellow for a one-year appointment beginning September 1, 2013. Additional fellowships are available for mid-career/senior clinicians and for psychologists with expertise in health and behavior issues, including

HIV/AIDS, and psychologists with a background in developmental or clinical psychology and experience working directly with children. The fellowship stipend ranges from \$75,000 to \$90,000, depending upon years of post-doctoral experience. In addition, APA provides reimbursement for health insurance coverage and a \$3,750 stipend for professional development and relocation expenses during the fellowship year. Final selection of fellows will be made in early spring of 2013.

ASSOCIATION FOR INSTITUTIONAL RESEARCH

IMPROVING INSTITUTIONAL RESEARCH IN POSTSECONDARY EDUCATIONAL INSTITUTIONS

DUE: JAN 10

With support from the National Science Foundation (NSF), the National Center for Education Statistics (NCES), and the National Postsecondary Education Cooperative (NPEC), the Association for Institutional Research (AIR) operates two grant programs that support research on a wide range of issues of critical importance to U.S. higher education. The program has two separate purposes: (a) NSF and NCES support grants aim to increase the number of researchers using national datasets and demonstrate the contribution that these datasets make to the national base of knowledge on higher education policy, theory, and practice; and (b) The NPEC funding supports grants that increase the understanding and knowledge of a specific issue area identified by NPEC. Two levels of grants are supported: (1) **RESEARCH GRANTS:** Faculty and practitioners are eligible for research grants of up to \$40,000 for one year of independent research. (Note: These research grants are not available to students). All grant recipients must be affiliated with a U.S. postsecondary institution or relevant non-profit higher education organization. (2) **DISSERTATION GRANTS:** Doctoral students are eligible for dissertation grants of up to \$20,000 for one year to support dissertation research and writing under the guidance of a faculty dissertation advisor.

CEC ARTSLINK**ARTSLINK PROJECTS**

The Gladys Kriebel Delmas Foundation announces its 2013-2014 program of grants (predoctoral and postdoctoral) for travel to and residence in Venice and the Veneto. Grants will be awarded for historical research specifically on Venice and the former Venetian empire, and for study of contemporary Venetian society and culture. Disciplines of the humanities and social sciences are eligible areas of study, including (but not limited to) archaeology, architecture, art, bibliography, economics, history, history of science, law, literature, music, political science, religion, and theater. **ELIGIBILITY:** Applicants must (i) be citizens or permanent residents of the United States, (ii) have experience in advanced research at the graduate level or equivalent, and (iii) if graduate students, have fulfilled all doctoral requirements except completion of the dissertation (but including acceptance of dissertation proposal) by December 15, 2012. **FUNDING:** Applications will be entertained for grants up to a maximum of \$19,900 for a full academic year. Grants for the maximum amount are rarely awarded, and successful applicants are frequently awarded less than the amount requested. Funds are granted primarily for research in Venice and the Veneto only, and for transportation to, from, and within the Veneto.

ENVIRONMENTAL PROTECTION AGENCY**P3 AWARDS: A NATIONAL STUDENT DESIGN COMPETITION FOR SUSTAINABILITY FOCUSING ON PEOPLE, PROSPERITY, AND THE PLANET**

DUE: DEC 11
WRITE: Cynthia L. Nolt-Helms

PHONE: 703/347-8102

The U.S. Environmental Protection Agency (EPA), as part of the P3-People, Prosperity and the Planet Award Program, is seeking applications proposing to research, develop, and design solutions to real world challenges involving the overall sustainability of human society. The P3 competition highlights the use of scientific principles in creating innovative projects focused on sustainability. The P3 Award program was developed to foster progress toward sustainability by achieving the mutual goals of economic prosperity, protection of the planet, and improved quality of life for its people-- people, prosperity, and the planet - the three pillars of sustainability. The EPA offers the P3 competition in order to respond to the technical needs of the world while moving towards the goal of sustainability. **ELIGIBILITY:** Public nonprofit institutions / organizations (limited to degree-granting public institutions of higher education) and private nonprofit institutions / organizations (limited to degree-granting private institutions of higher education) located in the U.S. are eligible to apply. **FUNDING:** It is anticipated that approximately \$1,575,000 total will be available for all Phase I & II grant awards. Potential Funding per Award: Up to \$15,000 per Phase I grant including direct and indirect costs. Proposals for Phase I grants must be for only one year. Upon the successful completion of Phase I, grant recipients will have the opportunity to apply for a P3 Phase II grant of up to \$90,000 total for two years including direct and indirect costs. Cost-sharing is not required for either Phase I or Phase II grants.

WEB: http://epa.gov/ncer/rfa/2012/2012_star_neurotox.html
E-MAIL: harrison.bronda@epa.gov
PHONE: 703/347-8080

The U.S. Environmental Protection Agency (EPA), as part of its Science to Achieve Results (STAR) program, is seeking applications proposing research that will identify and / or provide a better understanding of adverse

outcome pathways (AOPs) that lead to developmental neurotoxicity (DNT). Such research should advance the state of knowledge by linking key events along the continuum from exposure to adverse outcomes, including windows of susceptibility, and ultimately resulting in AOP-based data and models for chemical testing that will allow risk assessors to predict DNT. EPA is particularly interested in funding research projects that focus on endocrine signaling pathways that alter neurodevelopment, but will accept research proposals that address other AOPs. **ELIGIBILITY:** Public nonprofit institutions / organizations (includes public institutions of higher education and hospitals) and private nonprofit institutions / organizations (includes private institutions of higher education and hospitals) located in the U.S., state and local governments, Federally Recognized Indian Tribal Governments, and U.S. territories or possessions are eligible to apply. **FUNDING:** \$4 million for about 5 awards. Potential Funding per Award: Up to a total of \$800,000 including direct and indirect costs, with a maximum duration of four years. Cost-sharing is not required.

The FDA recognizes the value of supporting high quality, small scientific conferences. A small scientific conference is defined as a symposium, seminar, workshop, or any formal meeting, whether conducted face-to-face or virtually to exchange information and explore a defined subject, issue, or area of concern impacting the public's health within the scope of the FDA's mission. Support of such meetings is contingent upon the fiscal and programmatic interests and priorities of the FDA's respective Offices and Centers. Therefore, each small scientific conference grant application must contain a cover letter. The cover letter must clearly state the primary objectives of the meeting, anticipated outcomes, and the FDA Office / Center that the application should be forwarded to for consideration. **FUNDING:** Small scientific conference grant budgets must reflect the total cost of the conference, the costs for which support is requested (not to exceed \$50,000), and a list of anticipated funders (federal and non-federal).

Houghton Library is the principal rare book and manuscript library of Harvard College. The Library's holdings are particularly strong in the following areas: European, English, American, and South American literature, including the country's pre-eminent collection of American literary manuscripts; philosophy; religion; history of science; music; printing and graphic arts; dance; and theatre. Fellows will also have access to collections in Widener Library as well as to other libraries at the University. Preference is given to scholars whose research is closely based on materials in Houghton collections, especially when those materials are unique; fellowships are normally not granted to scholars who live within commuting distance of the library. Each fellow is expected to be in residence at Houghton for at least four weeks during the period from July 2013 through June 2014 (these do not have to be consecutive weeks), and each fellow is expected to produce a written summary of your experience working with the collection. **FUNDING:** The stipend for each fellowship is \$3,000.

The goal of the Museums for America (MFA) program is to strengthen the ability of an individual museum to serve the public more effectively by supporting high-priority activities that advance its mission, plans, and strategic goals and objectives. MFA grants support activities that

strengthen museums as active resources for lifelong learning, as important institutions in the establishment of livable communities, and as good stewards of the nation's collections. MFA grants can fund both new and ongoing museum activities and programs. Examples include planning, managing and conserving collections, improving public access, training, conducting programmatic research, school and public programming, producing exhibitions, and integrating new or upgraded technologies into your operations. **FUNDING:** MFA grant awards range from \$5,000 to \$150,000 for up to three years. Matching requirement is 1:1.

MACDOWELL COLONY

RESIDENCIES FOR WRITERS, COMPOSERS, AND ARTISTS

DUE: JAN 15 APR 15 SEP 15

FAX: 603/924-9142

The MacDowell Colony provides time, space, and an inspiring environment to artists of exceptional talent. A MacDowell Fellowship, or residency, consists of exclusive use of a studio, accommodations, and three prepared meals a day for up to eight weeks. MacDowell Fellows are selected by its admissions panels, which are comprised of a revolving group of distinguished professionals in each artistic discipline who serve anonymously for three years. **ELIGIBILITY:** The Colony accepts applications from artists working in the following disciplines: architecture, film/video arts, interdisciplinary arts, literature, music composition, theatre, and visual arts. The sole criterion for acceptance is artistic excellence, which the Colony defines in a pluralistic and inclusive way. MacDowell encourages applications from artists representing the widest possible range of perspectives and demographics, and welcomes artists engaging in the broadest spectrum of artistic practice and investigating an unlimited array of inquiries and concerns. To that end, emerging as well as established artists are invited to apply. **FUNDING:** The MacDowell Colony believes that all talented artists should have the opportunity a MacDowell Fellowship provides. There is no cost for a Fellowship; in order to open the residency experience to a wider, more diverse community of artists, however, MacDowell offers two financial assistance programs to those who have been awarded a Fellowship: (1) Stipends; and (2) Travel Grants.

NATIONAL ENDOWMENT FOR THE HUMANITIES**COLLABORATIVE RESEARCH GRANTS**

DUE: **DEC 6**
WRITE: National Endowment for the Humanities

PHONE: 202/606-8200

Collaborative Research Grants support interpretive humanities research undertaken by a team of two or more scholars, for full-time or part-time activities for periods of a minimum of one year up to a maximum of three years. Support is available for various combinations of scholars, consultants, and research assistants; project-related travel; field work; applications of information technology; and technical support and services. All grantees are expected to communicate the results of their work to the appropriate scholarly and public audiences. Eligible projects include: (a) research that significantly adds to knowledge and understanding in the humanities; (b) conferences on topics of major importance in the humanities that will benefit scholarly research; (c) archaeological projects that include the interpretation and communication of results (projects may encompass excavation, materials analysis, laboratory work, field reports, and preparation of interpretive monographs); and (d) research that uses the knowledge and perspectives of the humanities and historical or philosophical methods to enhance understanding of science, technology, medicine, and the social sciences. **FUNDING:** Awards normally range from \$25,000 to \$100,000 per year. Awards for conferences are typically made for a minimum of one year and normally range from \$15,000 to \$65,000 per grant. Successful applicants will be awarded a grant in outright funds, matching funds, or a combination of the two, depending on the applicant's preference and the availability of funds.

NATIONAL SCIENCE FOUNDATION**LONG-TERM RESEARCH IN ENVIRONMENTAL BIOLOGY (LTREB)**

PHONE: 703/292-8133

Through the LTREB program, the Division of Environmental Biology (DEB) and the Division of Integrative Organismal Systems (IOS) encourage the submission of proposals that generate extended time series of biological and environmental data to address ecological and evolutionary processes and resolve important issues in organismal and environmental biology. Researchers must have collected at least six years of previous data to qualify for funding, and these data must motivate the proposed research. The proposal also must present a cohesive conceptual rationale or framework for ten years of research. Questions or hypotheses outlined in this conceptual framework must guide an initial 5-year proposal as well as a subsequent, abbreviated renewal. Together, these will constitute a decadal research plan appropriate to begin to address critical and novel long-term questions in organismal and environmental biology. As part of the requirements for funding, projects must show how collected data will be shared broadly with the scientific community and the interested public. **FUNDING:** \$3 million for 6-8 awards per year.

Anthropological research may be conducted under unusual circumstances, often in distant locations. As a result the ability to conduct potentially important research may hinge on factors that are impossible to assess from a distance and some projects with potentially great payoffs may face difficulties in securing funding. This program gives small awards that provide investigators with the opportunity to assess the feasibility of an anthropological research project.

The information gathered may then be used as the basis for preparing a more fully developed research program. Projects which face severe time constraints because of transient phenomena or access to materials may also be considered. *FUNDING*: \$150,000 for about 3-5 awards per year.

Integrated Earth Systems (IES) is a program in the Division of Earth Sciences (EAR) that focuses on the continental, terrestrial and deep Earth subsystems of the whole Earth system. The overall goal of the program is to provide opportunity for collaborative, multidisciplinary research into the operation, dynamics and complexity of Earth systems at a budgetary scale between that of a typical project in the EAR Division's disciplinary programs and larger scale initiatives at the Directorate or Foundation level. Specifically, IES will provide research opportunities for the study of Earth systems from the core of the Earth to the top of the critical zone with a specific focus on subsystems that include continental, terrestrial and deep Earth subsystems at all temporal and spatial scales (NROES, 2012). IES will provide opportunities to focus on Earth systems connected to topics which include (but are not limited to) the continents; the terrestrial, surficial Earth systems including physical, chemical and biotic dimensions; linkages among tectonics, climate, landscape change, topography and geochemical cycles including core and mantle processes. *FUNDING*: The award size for IES projects is expected to range between \$1,000,000 and \$3,000,000 for projects of 3 to 5 years duration, although smaller awards may be made. The scope of IES projects is expected to be beyond that which can be supported in EAR's disciplinary programs. It is estimated that 4-10 awards will be made from the anticipated total funding amount of \$10,250,000.

Grant Opportunities for Academic Liaison with Industry (GOALI) promotes university-industry partnerships

by making project funds or fellowships/traineeships available to support an eclectic mix of industry-university linkages. Special interest is focused on affording the opportunity for: (a) Faculty, postdoctoral fellows, and students to conduct research and gain experience in an industrial setting; (b) Industrial scientists and engineers to bring industry's perspective and integrative skills to academe; and (c) Interdisciplinary university-industry teams to conduct research projects. This solicitation targets high-risk / high-gain research with a focus on fundamental research, new approaches to solving generic problems, development of innovative collaborative industry-university educational programs, and direct transfer of new knowledge between academe and industry. GOALI seeks to fund transformative research that lies beyond that which industry would normally fund. *FUNDING:* \$5 million for 60-80 awards.

The New York State Archives and the Archives Partnership Trust announce the availability of awards for qualified applicants to pursue research using historical records in the New York State Archives. The Larry J. Hackman Research Residency Program is intended to support advanced work in New York State history, government or public policy by covering research expenses. It also encourages public dissemination of research products. The program honors the New York State Archivist who managed the dramatic development of the State Archives between 1981 and 1995. *ELIGIBILITY:* Applicants must conduct original research at the New York State Archives. Previous residents have included academic and public historians, graduate students, independent researchers and writers, and primary and secondary school teachers. Projects involving alternative uses of the Archives, such as research for multimedia projects, exhibits, documentary films, and historical novels, are welcomed. The topic or area of study must draw on government records in the New York State Archives.

Preference will be given to projects that: (1) have application to enduring public policy issues, particularly in New York State, (2) rely on holdings that have been little used and are not available electronically or on microfilm, and (3) have a high probability of publication or other public dissemination. *FUNDING:* Awards are intended to defray costs of travel, lodging, meals, photo duplication, and other research-related expenses. Award amounts range from \$100 to \$4,500 depending on the length of stay at the State Archives and research expenses. Research visits range from a few days to several weeks depending upon the nature of the research. Awards will not supplement salary or honoraria.

Fellowships at the Smithsonian Institution provide students and scholars with opportunities to pursue independent research projects in association with members of the Smithsonian professional research staff. **PREDOCTORAL FELLOWSHIPS** - These fellowships allow students to conduct research for periods of three to twelve months. Applicants must have completed coursework and preliminary examinations for the doctoral degree, and must be engaged in dissertation research. In addition, candidates must have the approval of their universities to conduct their doctoral research at the Smithsonian. **POSTDOCTORAL AND SENIOR FELLOWSHIPS** - Postdoctoral Fellowships of three to twelve months are available for scholars who have held the doctoral degree or equivalent for fewer than seven years as of the application deadline. Senior Fellowships of three to twelve months are available for scholars who have held the doctoral degree or equivalent for more than seven years as of the application deadline. Applications for senior fellowships may be made up to eighteen months in advance. Stipends for senior fellowships are the same as for the postdoctoral program, but the Smithsonian's stipend may be matched by other sources of funding such as a sabbatical

salary. *FUNDING*: Predoctoral - \$30,000 per year. Senior and Postdoctoral - \$45,000 per year. Earth and Planetary Sciences Senior and Postdoctoral - \$50,000 per year.

"Diagnosis in Context: Culture, Politics, and the Construction of Meaning" -- The Robert Penn Warren Center for the Humanities will host a year-long interdisciplinary faculty seminar to explore the types of work that medical diagnoses perform. Modern medicine typically defines diagnosis as the act of identifying or naming disease, with disease understood as a pathophysiological condition that produces characteristic symptoms and follows a predictable path. But such straightforward statements hide more than they reveal. Specifically, they leave unexplored the power of language and labels to create imagined boundaries between and among populations-boundaries that can affect the lived experience of disease and disability as well as the allocation of resources. Both the act and the understanding of diagnosis invite interdisciplinary discussion about how, where, when and why diagnostic meanings are made. Working at the intersections of culture, literature, medicine, and politics, scholars in the Warren Center Fellows Program will study the production of diagnoses, the various meanings ascribed to them across time and place, and the work they do for individuals and communities trying to navigate the elusive boundaries between health and disease. Seminar participants will represent a wide range of disciplines and will employ multiple methodologies to examine together the various uses, abuses, and meanings of diagnosis. These methodologies might include cross-cultural comparisons, historical analysis, literary and/or rhetorical criticism, disability studies, public policy studies, and medical and clinical research. *ELIGIBILITY*: The Center invites applications from

scholars in all disciplines whose lively presence will help to focus its work and stimulate discussions. The Center anticipates that the successful applicant will have completed the terminal degree in her/his field at the time of application and will have a record of scholarly publication. The seminar meets weekly and will allow the visiting fellow ample time to pursue a major research project. The combined interests of the visiting fellow and the Vanderbilt faculty fellows will determine the form and content of seminar discussions. *FUNDING*: The Visiting Fellow is provided with a spacious office within the Center's own building. The fellowship pays a stipend of up to \$50,000 and provides \$2,000 in moving expenses.

The Agrarian Studies Program appoints fellows annually who are in residence for the year, present a paper, and attend the colloquia. This year the Program has four Fellows whose diversity reflects the breadth of the program, and a Research Affiliate who has already made an important contribution to agrarian studies. Applications are encouraged from knowledgeable "activists" and "public intellectuals" whose work on rural life transcends the academy. The broad theme for the colloquium series of the Program in Agrarian Studies, will be "Hinterlands, Frontiers, Cities, and States: Transactions and Identities." *ELIGIBILITY*: The Program will offer a limited number of fellowships, normally for one academic year. Younger scholars as well as established scholars are encouraged to apply. Research interests in line with the theme are desirable but not required. Graduate students who are working on their Ph.D.s may apply, but fellowship recipients must have completed their Ph.D. dissertations and present proof that they have received their Ph.D. degrees. Fellows are expected to be in residence in New Haven to take an active part in the intellectual exchange with other members of the Program.
